

Your Data Analyzed (YoDA)

Data. Insights. Action.

Get hands-on experience on Microsoft Power BI to accelerate your organization's business intelligence efforts. With a full day of instructor led, personalized and in-person training, arm yourself with the latest and greatest information about using Power BI in your organization. Combined this with a "bring your own data" experience where 2 additional days of proof-of-concept exercises, allow you to visualize your organizations' data - the way you want to see it and what you have is BI Heaven!

- ✓ 5 Days
- ✓ In Person
- ✓ Your Data
- ✓ Your Office

Objectives

- Learn how to connect, import & transform data from a variety of data sources, build real data models with YOUR data, author and publish Business Intelligence data.
- Learn how to customize and share your "data" to collaborate with other business groups securely inside your organization including mobile devices.
- Get practical hands-on experience with experts who specialize in the art and science of bringing data to life.

Training Schedule

Dashboard in a Day using Power BI

Classroom style session for 20 participants to familiarize them with Power BI Desktop, Modeling, Visualization, Reports, Row Level Security, Power BI Services, Dashboard, Automated Data Refresh and Collaboration. Client will be responsible to sign up for Power BI License.

Design the reporting platform for your enterprise

Assess and connect your data sources to a central data repository on SQL 2016, create reporting data model, Wireframe reports and dashboards - 4 Participants from Client, Azure and Power BI license will be provided by client.

Develop and deploy the relevant visualizations on Power BI reporting platforms

Power BI platform is setup using your data, apply Row Level Security, Create Dashboard, and Data Refresh.

Remote Support (4 Hours)

4 hours of remote support for 4 participants to help in developing any additional reports and dashboards within the scope of POC. Demo Power BI to users at the client organization.

Quickly Access Your Data

Get a live 360° view of your business

Discover and explore

Collaborate across your organization

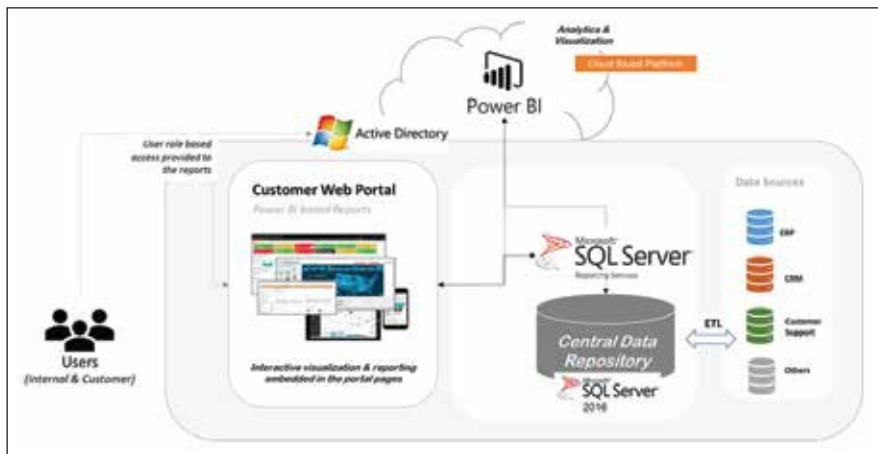

Gain insights from any device

Allow anyone to discover, visualize, explore and analyze data

Let your Data Spark more than a Thousand Words

Welcome to the world of Power BI! Orion has delivered successful engagements in BI solutions and data insights that help customers' journey across the entire business transformation process successfully, and brings information at the point of making decisions. This is a visual interactive business analytics service that is available in desktop, mobile and embedded versions for both on-premise and cloud.

Experience the power of business intelligence with YOUR data in a 2-day proof-of-concept exercise. Learn how to model you organizations' data using Microsoft's Power BI to extract the most out of your data with our experts watching and advising on the best approach to maximize the technology platform to your benefit. The proof of concept exercise includes three primary components - the central data repository or data warehouse that will house the data for reporting; the ETL services to bring in the data and the reporting and visualization using Power BI.
